

Album Cover Mashup

We all love music, whether it's old or new. Your next assignment is based on music, specifically album covers. Have you ever noticed the artwork on an album cover? Album covers have ranged from a simple photograph to an overly edited digital graphic manipulation. Filled with color to catch your eye, let's look at some of your favorite artists' covers and use them as inspiration for this project.

Start: Find at least 5-10 album covers that you like. These could be from one specific artist or from All different artists. Drag and drop these photo files to your desktop.

Template: Begin with the template posted on classroom. Download it and open it in Photoshop.

Photoshop: You will want to begin with adding a background, choose one of the covers to be your main background.

- Then using tools such as the quick selection tool, start adding more images from the other albums.
- Overall, this will end up being similar to a collage, you should use at least 5-8 albums in your mashup.
- Make photos larger and smaller, overlap them, change their opacity and include and other cool effects such as filters.
- Make these your own and make them personal!
