

Use COMPOSITION to take one photograph showing each of the techniques listed:

Rule of Thirds-a photograph that is divided by the picture plane into thirds, with one third of the image having a subject matter and the rest being a background.

Weight-the weight of the photograph is heaviest on the bottom right hand corner/area of the picture plane.

The “Z”-the viewer’s eye travels left to right across the image, then diagonally down to the left hand corner.

Cropping-take a photograph of an image that you can drastically crop in Photoshop to make more interesting.
